HIGHLIGHTS

- biochemistry is the basis of life sciences and a fascinating subject linking chemistry, biology, physiology and biophysics
- research highlights in Bonn: lipids, membranes, and nucleic acids
- students are individually integrated at an early stage into the interdisciplinary groups of the LIMES Institute with direct access to state of the art equipment
- opportunities for conducting research projects at national and international universities
- workshops with representatives of life science industries
- a mentoring system helps the students to study efficiently, to plan their career in a focused manner, and to become independent

Information Day
May 25, 2018!

Specialise in

- **Cellular Biochemistry**
- **Chemical Biology**
- **Biophysics**
- **Physiology**

Apply now!

Degree

Master of Science (M. Sc.)
in Biochemistry

Duration

4 semesters (including the Master thesis)

Start

Winter semester (October)

Study focus

Cellular Biochemistry, Chemical Biology,
Biophysics and Physiology

Application deadline

June 30th for EU citizens
April 30th for Non-EU citizens

Course language

English
