

# M.Sc. in Immunobiology: from molecules to integrative systems

**Information Day  
June 2, 2017!**

**Specialise in**

- **Immunology**
- **Systems Biology**

**Apply now!**

## HIGHLIGHTS

- Immunology is a central research focus in Bonn, e.g. DFG Cluster of Excellence *ImmunoSensation*
- students are individually integrated at an early stage into the interdisciplinary groups of the LIMES Institute with direct access to state of the art equipment
- opportunities for conducting research projects at national and international universities
- workshops with representatives of life science industries
- a mentoring system helps the students to study efficiently, to plan their career in a focused manner, and to become independent

### Degree

Master of Science (M. Sc.)  
in Immunobiology

### Duration

4 semesters (including the Master thesis)

### Start

Winter semester (October)

### Study focus

Immunology and Systems Biology  
including Genomics, Epigenetics and  
Bioinformatics

### Application deadline

June 30th for EU citizens  
April 30th for Non-EU citizens

### Course language

English
