

International Business and Management

Hochschule Osnabrück
Master of Arts

Program

Up-to-date management knowledge

You would like to study in Germany and at the same time prepare for an international career? To achieve this goal, studying International Business and Management M.A. at Osnabrück University of Applied Sciences could be the ideal option for you:

- Through the international curriculum, our graduates are well prepared for specialized and leading positions in international companies and organisations.
- Both German and international students from all over the world study together in intercultural teams.
- Students can opt to study abroad for a semester or even pursue a dual degree.
- The program can be studied completely in English language.
- Lecturers with international experience provide for in-depth insights into current international business and management issues.
- The master program has a strong practical orientation, which is manifested through practice-related assignments or lecturers who have previously worked in international companies.

The Faculty of Business Management and Social Sciences is a member of EFMD Global. EFMD (European Foundation of Management Development) is a network of business schools and corporations dedicated to enhance excellence in management education and development globally.

About the University

This is what the Osnabrück University of Applied Sciences stands for

The Osnabrück University of Applied Sciences has a high reputation in the region and far beyond. It is the largest and highest performance university of applied sciences in Lower Saxony. Four faculties (Agricultural Sciences and Landscape Architecture, Engineering and Computer Science, Management, Culture and Technology in Lingen, as well as Business Management and Social Sciences) and the Institute of Music form the backbone of the university at the two locations in Osnabrück and Lingen.

With around [110 degree programs](#), the Bachelor's, Master's and advanced training levels is truly comprehensive. Our university has been a pioneer in many areas of academic training – in the establishment of new degree programs, for example – and has thus earned the reputation of being an innovative and progressive institution of higher education. Now with 13,700 students (as of dec. 2016), our ever-growing university has reached an impressive size. Nonetheless, it has cultivated and maintained the character of a familiar and personal place of teaching and learning.

Lower Saxony's leader in research among universities of applied sciences

The university has a noteworthy research orientation. It is committed to the approach of a "University of Applied Sciences". That is, the university is actively involved in society and sees research as an essential contribution to practically assist in solving socially relevant issues. It places great emphasis on a close dialog with its economic, social and political environment. "Healthcare services research, care management and informatics in healthcare", "Pioneering agricultural system technologies", "Innovative materials and material technologies" as well as "Energy systems, management and law" are four of the profile-defining research concentrations.

With the establishment now of five domestic research priorities on the issues of inclusion, the energy supply of the future, urban agriculture, musician's health and organizational communication, the university provides considerable impetus for cross-disciplinary research. The domestic research is funded through internal funds alone.
