

# International Bachelor of Wood Technology

Technische Hochschule Rosenheim (University of Applied Sciences)  
Bachelor of Engineering

## Overview

The International Bachelor of Wood Technology is aimed at young people abroad who have a passion for wood but only limited knowledge of German. It offers a comprehensive and solid university engineering education in the field of wood technology.

**Academic degree:** Bachelor of Engineering

**Duration:** 8 Semesters

**Models:** Full time, study with intensive in-company training

**ECTS:** 240

**Language:** german and english

**course start:** summer semester

**Study location:** Campus Rosenheim

**Application period:** 01. Nov-15. Jan

## Course content

The first three semesters cover the fundamental engineering studies, as well as specific courses in wood and wood-based materials. At the same time, you will learn the German language (level B2 / C1 CEFR) in language courses tailored for the programme.

Your courses in the first semester are held in English. From the second semester onwards you will attend selected subject modules in German and, from the third semester onwards, German is the language of instruction.

Beginning in the fourth semester you will join your peers from the German-language wood technology programme and attend the higher level engineering courses and electives in German.

The sixth semester is reserved for a practical semester / internship in one of the many local companies in Germany or in a company abroad.

## Career opportunities

The IWT engineering degree, with its strong focus on engineering fundamentals combined with organizational and business management skills, offers outstanding professional development and career opportunities. As specialists in wood technology from Rosenheim, you will be perfectly equipped for exciting technical engineering roles as well as leadership positions. Graduates of the IWT program also become part of the international "Rosenheim Wood Technology Network."

With fluency in both German and English and excellent technical expertise, IWT graduates are ideally positioned for success in the German and global job markets. Another great option is to continue your studies in Rosenheim by pursuing a Master's degree in wood technology.

## Application

In order to be admitted to the degree programme, you must meet certain requirements and submit the relevant documents with your application:

- University entrance qualification
- English language skills at level B2
- German language skills at level A
- Industry experience of at least ten weeks work
