

Integrated Social and Cognitive Psychology

Constructor University Bremen
Bachelor of Science

Program

Different levels of influence

The Constructor University BSc in Integrated Social and Cognitive Psychology adopts a holistic approach to comprehend human behavior, acknowledging the intricate interplay of factors shaping our actions and thoughts. This interplay encompasses biological, psychological, and socio-cultural elements that interact in intricate ways.

Our program is designed to equip students with the tools to analyze, model, and ultimately influence these multi-level interactions. Through a thorough exploration of the relationships among individuals, social groups, and cultures, students gain insight into how various levels of influence contribute to the development of human behavior.

This multi-level perspective offers a unique and insightful approach to psychology, allowing students to cultivate a comprehensive understanding of human behavior and its influencing factors. Upon completion of the program, students will possess the skills and knowledge required to make a meaningful impact in their chosen field.

Career

Career perspectives

The BSc in Integrated Social and Cognitive Psychology at Constructor University paves the way for a dynamic professional career and establishes a solid foundation for an academic journey, particularly in an international context. Graduates emerge as strong candidates for entry-level positions in various fields requiring skills in analyzing, designing, or enhancing human interaction, presentation, and communication. Career opportunities span diverse sectors such as advertising, counseling, diversity management, health promotion, human resource management, intercultural relations, management consulting, market research, media, as well as applied research in companies, public institutions, and non-governmental organizations.

Additionally, the program prepares students for international specialized Master's programs in psychology and related fields, as well as integrated, research-focused Master-PhD programs.

It's essential to note that psychology practice requirements vary by country and often by state. Individuals should check the specific requirements of the country or state they intend to practice in. A degree in ISCP qualifies graduates for entry into many accredited M.Sc. programs in the U.

S., the UK, and other countries, meeting prerequisites for licensure in those regions. For detailed information, applicants are advised to refer to the respective university websites. Given its interdisciplinary focus, a degree in ISCP may not guarantee admission to general Master's programs in Psychology or Psychotherapy at German universities and does not specifically prepare for licensure as a Psychotherapist in Germany. For further details, please consult the website of the German Society of Psychology DGPs (available in German only).
