- completed bachelor's degree in economics or
- completed bachelor studies with a minimum of 60 ECTS in economics modules

Perspectives

Benefits

Practice, Practice, Practice
The Business Administration Master is a practice-oriented program, meaning you will already get to know companies first-hand. In a separate module, you will visit different companies and compare their business models. This is how theory and practice complement each other in the Business Administration Master.

Digital across all Modules
Digitalization is discussed across all modules of the Business Administration Master. The Software Engineering module provides a basic understanding of programming and the importance of software for companies.

Optional Stay Abroad
The 3rd semester is the time for an optional stay abroad. You can choose from our more than 50 partner universities worldwide, or attend a non-partner university of your choice.

Double Degree Possible
You have the opportunity to obtain a double degree in cooperation with one of our renowned partner universities, namely Solbridge International School of Business in South Korea or City University of Seattle.

Start-up Workshop
The Start-up Workshop provides you with comprehensive knowledge for self-employment. You will learn about the necessary decisions to be made, from coming up with the initial idea and financing, all the way to legal frameworks, as well as product and customer management.

Practicing Soft Skills
Negotiating, presenting, resolving conflicts, and networking - the daily work routine requires different soft skills. In a training course, you will learn these skills based on exercises and case studies.

Business Game: Real Decisions in a Virtual Company
Within the framework of a business game, you will manage your own company. This way, you learn about the complex correlations within a company.

Business Psychology: Business is more than Numbers
People are paramount for economy. Moods, personal experiences or patterns of action influence decisions. Knowing psychological processes makes it easier to understand companies.

Ethics: Corporate Values are Not Just on the Balance Sheet
Which values should a manager follow? How do you make a decision when these values are in conflict with economic goals? Management needs a foundation of values. We provide you with orientation for your ethical compass.
